

Formation and Goals of the International Board of Medical Physics (IBMP) Constituting Panel

E.S. Sternick, PhD.

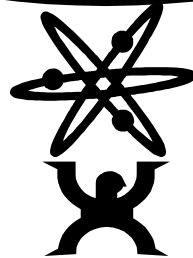

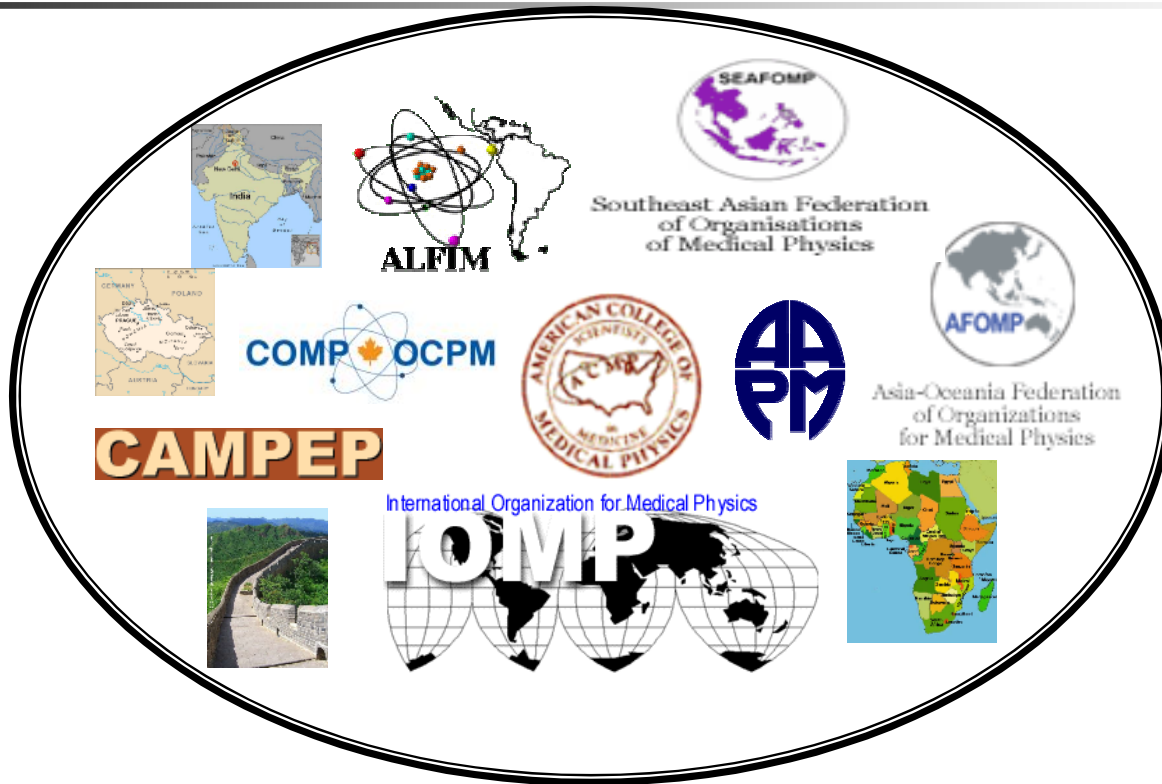

Constituting Panel Mission

- **Organized by the ACMP to serve as an expert consulting resource in support of an international medical physics certification effort**

IBMP Constituting Panel

Goal

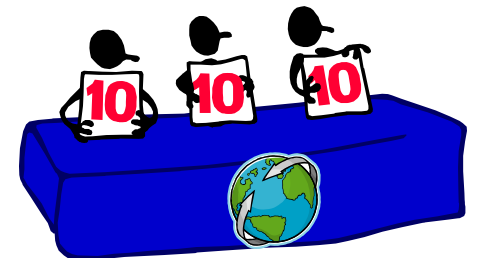

- **To create guidelines for a new International Board that will offer peer certification in the physical aspects of radiation oncology, diagnostic radiology and nuclear medicine**

Action Item

- 1. Review the need for a standardized evaluation process in countries and geographic regions throughout the world where formal medical physics certification does not currently exist**

Action Item

- 2. Develop international standards and procedures for a medical physics certification process**

Action Item

3. Determine qualification guidelines for candidates requesting examination for certification

Action Item

- 4. Offer assistance, when requested, in arranging, controlling and conducting examinations for testing the competence of certification candidates**

Action Item

- 5. Define the logistical, financial and administrative requirements for successfully implementing the medical physics certification process**

International Medical Physics Certification?

“Yes We Can!”
